As psychology advances its understanding of the mind and brain, perhaps the last remaining bastion of mystery about why we do what we do relates to love and attraction. However, recent research suggests that even the mysteries of attraction are being revealed - which is great news for those amongst us who would rather not leave seduction to chance.

In social psychology, seduction (also called inveigling or wheedling) is the process of deliberately enticing a person to engage in some sort of behavior, frequently sexual in nature. The word seduction stems from Indo-European roots and means literally "to lead astray." As a result, the term may have a positive or negative connotation. Seduction, seen negatively, involves temptation and ...
