I have read her book but I forget that exact exercise, I think the point of it is to be less precious about what you draw and to focus more on what you see training your eye so you spend more time looking at your subject instead of the page. It may feel like a silly exercise but this time round its not about producing a drawing, it's about getting your mind in the right frame (pun not intended).

[What Are the Functions of the Right Side of the Brain ...](#)

The act of perception itself -- making sense of what you see -- and the subsequent complex process of interpreting and translating to paper what you observe, are extraordinarily active and consuming tasks, and they require your whole brain. Drawing, like musical ability, is not a single ability, but a set of abilities, working simultaneously.
